

Homeschool planning sheet

For a U.S. family starting a plan. Record your actual state and legal route, then verify current official requirements. This worksheet is a planning aid, not a complete compliance checklist.

State / route / responsible office / date guidance checked:

Requirement or question	Official source / action / deadline
Starting, notice and renewal	
Subjects, instruction and records	
Progress review or evaluation	
Support, access or transition question	

A manageable first week

Learning goal (something observable):

Materials / adult preparation / accessibility supports:

Practice	Evidence to save	Next step

End-of-week review

What can the learner do with less help? Which difficulty recurs? Change one part of the approach and compare another dated sample. Maintain required records separately from these teaching notes.

What changed / next review or official deadline:

Start with the U.S. Department of Education state directory, then current state agency guidance and applicable law. Links and jurisdiction examples are in the accompanying guide. Keep personal records private.
